Texting and Driving

There is many ways a person can save someone else's life without even knowing it. According to many website pages that where found, texting and driving is a big problem in the United States but that's not the biggest problem. The problem is that many people are being injured and killed because of all that accidents that this distraction causes and the truth is that it's not just the people that are driving that are getting injured but people that are walking too. According to the Center for Disease Control and Prevention, more than 9 people are killed each day and more than 1,060 people are injured. Many Americans don't realize that texting and driving make it 23 times more likely for them to crash. Recent reports show that texting and driving is 6 times more dangers then drunk driving. Don't text and drive so death or injuries don't come to you. Try hard to save someone all the suffering that they would have to go through. Save lives instead of ruining them for other people and your own. Let's try to remember that there is nothing more important than your own life and that the text message or that call could wait till you're not driving any more. This change is very important because less people would be getting hurt and everyone would be safer and living a better life. Make your life last longer by not trying to kill yourself by texting or chatting on the phone while driving.
